# Guust en de techniek

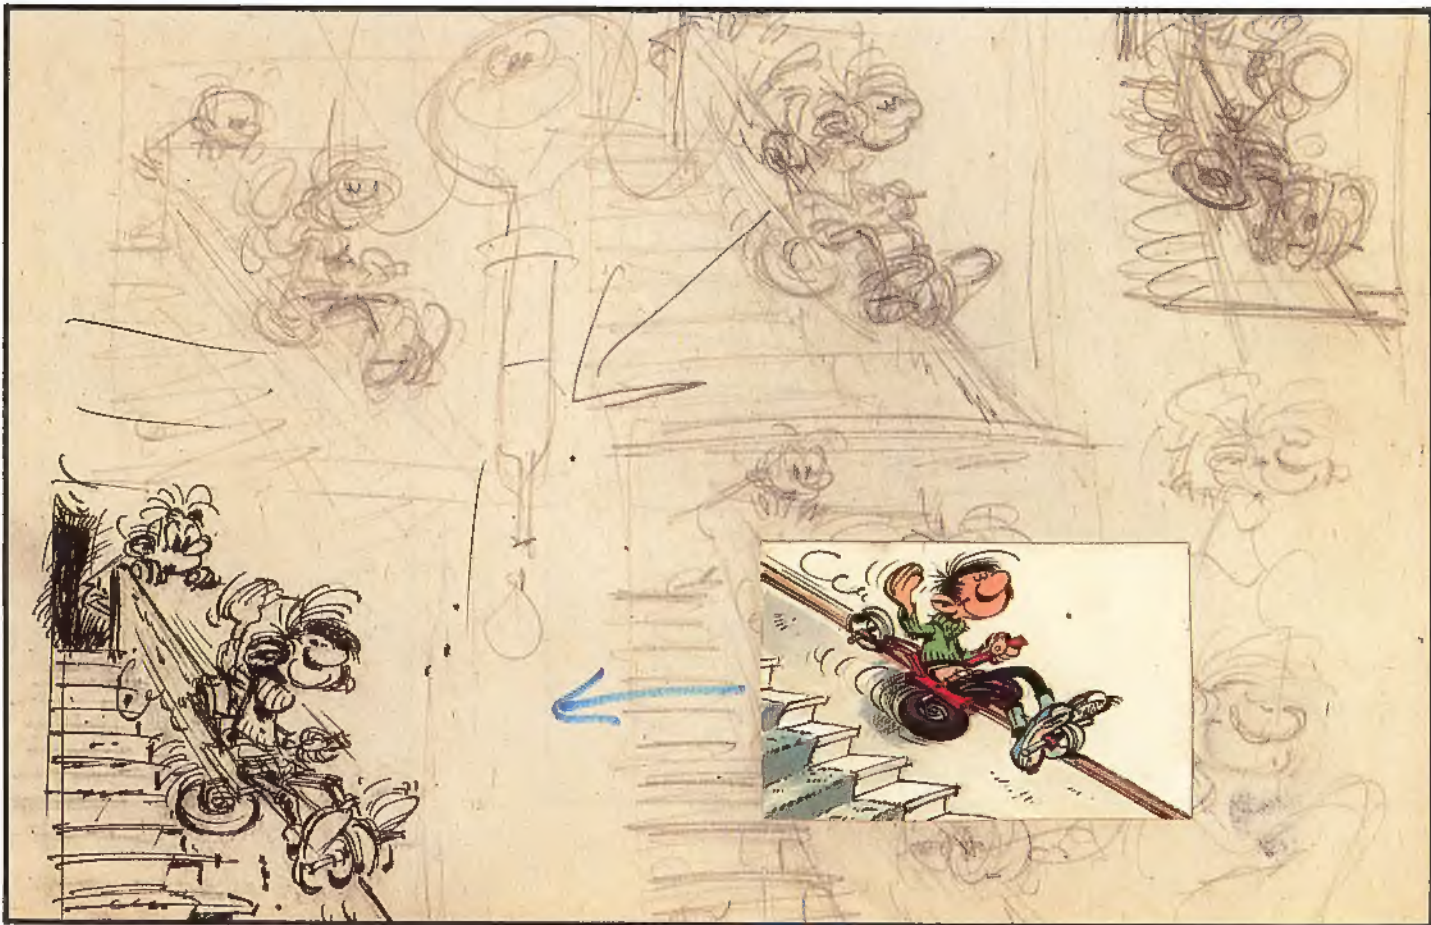

Het gebeurt maar zelden dat een strippersonage inventiever is dan zijn schepper. Guust heeft enorm veel 'technische' ideeën. Dat komt dan ook alleen doordat Franquin erg veel fantasie heeft. Dit lijkt logisch, en misschien zegt het niet zoveel, maar bekijk deze schetsen eens, en dan beseft je hoeveel onderzoek er nodig is om zo'n 'stom ding' te bedenken.

Boven: De kleinste kart ter wereld: een rolschaats met de motor van een grasmaaimachine.

Deze auto zonder motor bijvoorbeeld... hang hem gewoon achter een andere wagen.

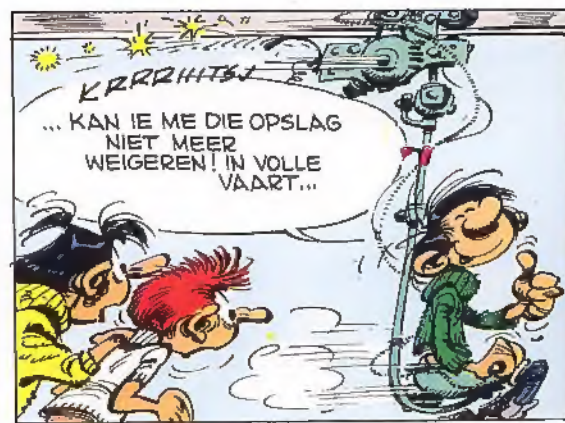

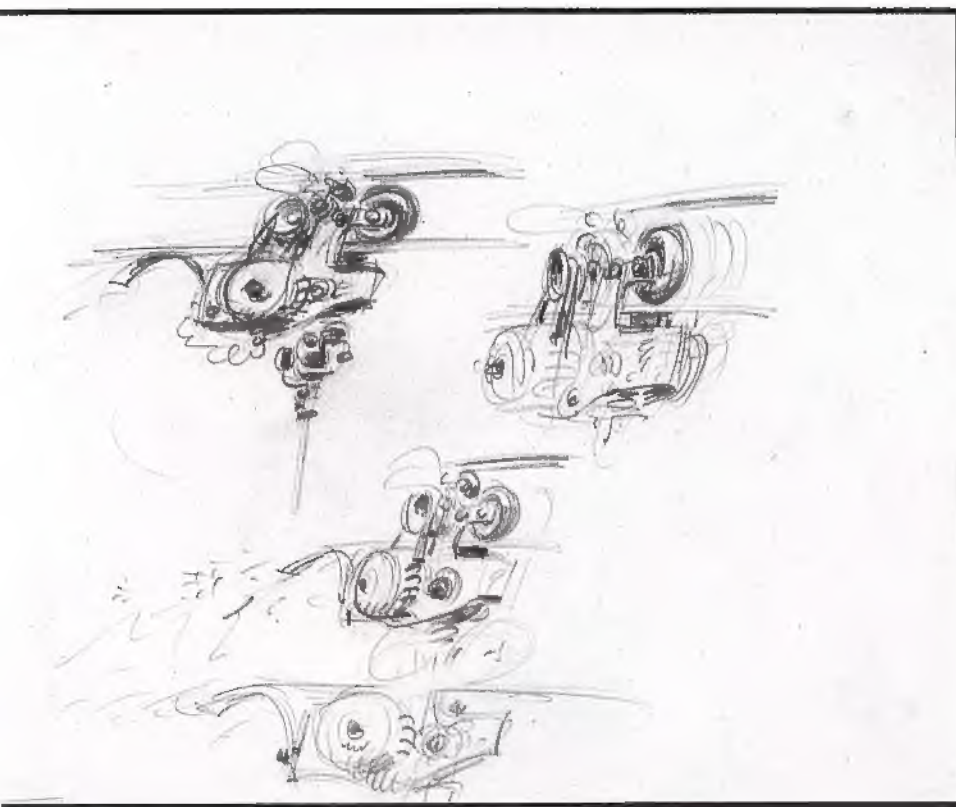

Een paar schetsen van het wagentje van Guust om trappen mee af te rijden.

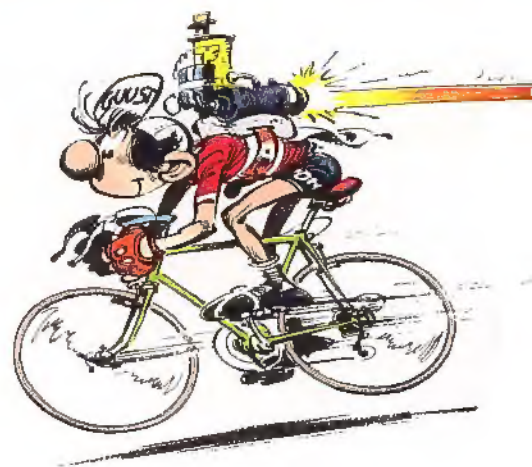

De rugzak-drager.

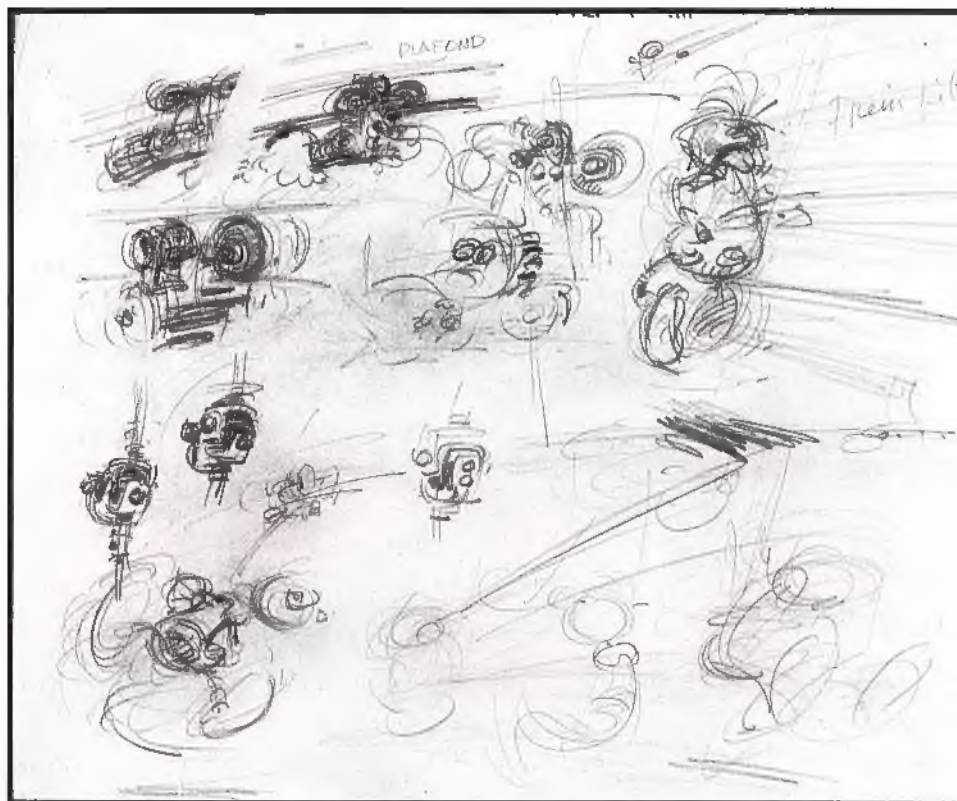

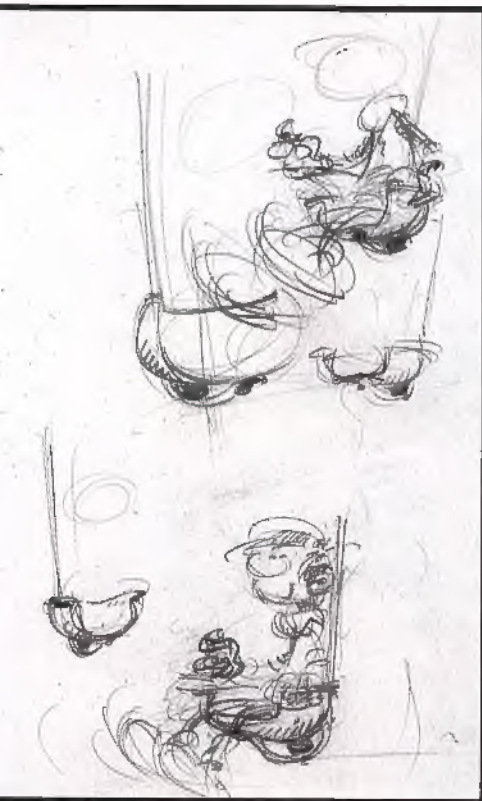

Franquin heeft Guust verschillen-  
de keren op het zadel van een fiets  
gezet...

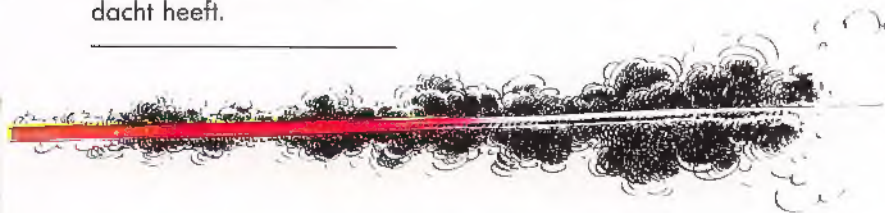

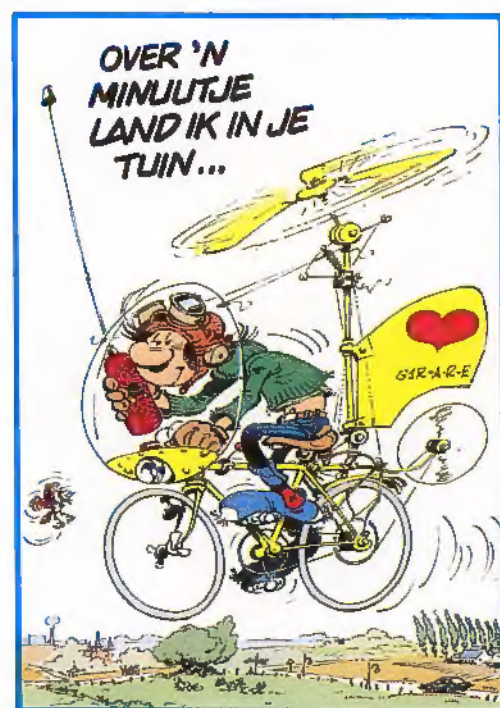

Boven: Hier heeft Franquin werkelijk overal aan gedacht: cardanische ophanging, een trolley-beugel voor stroomafname en een kuipstael... En dan maar beweren dat Guust dit bedacht heeft.

Een vliegende fiets. Eerder een poëtische dan een technische vondst.

Dit is een fiets met atoom-energie...

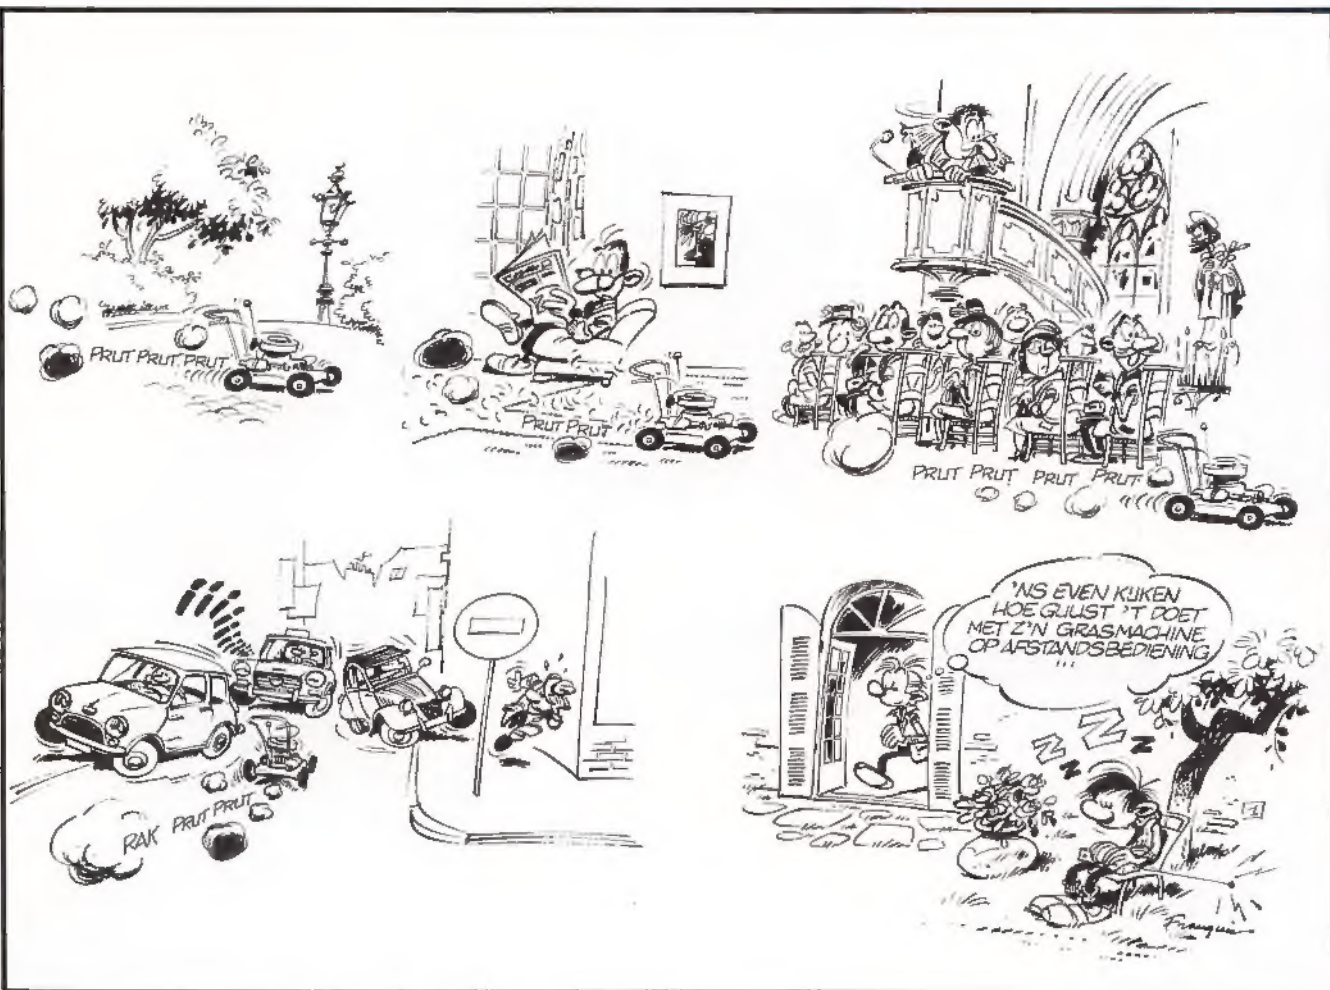

De onderzeeboot is een totaal gefantaseerde uitvinding van Franquin, die niet op zoek was naar een technisch systeem dat functioneerde.

De grasmaaimachine op afstandsbediening is nog één van de vele mobiele creaties die de creatieve geest van Franquin op papier heeft gezet.
